SUBJECT: ***Jet Dock Proposal***

Dear Mr. Fujimoto:

The Board of Directors for the Hawaii Kai Marina Community Association (HKMCA) reviewed your "Jet Dock" proposal at their recent 10 November 1998 Board Meeting.

The Board of Directors approved the basic Jet Boat Dock design proposal you have submitted providing that:

- ▶ *The Jet Dock is mounted to an existing dock or anchored to the shoreline with dead men, as indicated on the Hawaii Kai Marina Boat Dock Guidelines.*
- ▶ *The installation of a white stripe or white fascia is installed around the perimeter of the dock.*
- ▶ *Your entire boat dock installation and moored boat(s) do not exceed the 25' mooring zone restrictions of our Marina Rules and Regulations.*

Your application drawings should be modified to indicate your preference for positioning the Jet Boat Dock as well as, the type of anchoring system you desire for the installation. Your Jet Dock on the marina is temporarily authorized on an "as is" basis until the boat dock permit is issued by the U.S. Army Corps of Engineers. Upon receipt of the revised drawings, your boat dock proposal will be sent to the U.S. Army Corps of Engineers for review and final approval.

Upon final approval by the U.S. Army Corps of Engineers, you will receive a formal notification from them.

Sincerely,

Hugh F. Fraser
President, HKMCA
